

# Application Assessment

This assessment determines if the web and mobile applications used in your organisation provide a potentially vulnerable entry point into your network, and if your data is safe from theft and/or tampering.

Web and mobile applications are a potentially vulnerable entry point into an IT infrastructure. Hackers often take advantage of this to gain access to the corporate network.

Since many applications store and/or use sensitive information, proper controls must be put in place to protect this data.

Only an extensive knowledge of information security make it possible to propose these high added-value services, whose aim is to ensure the in-depth integrity of the company's IT infrastructure.

The resistance of your infrastructure is tested in different ways, such as:

## Black box

The analyst works "in the dark" with no preliminary information. He tries to exploit the vulnerabilities of your installed web applications without you giving him any initial hint.

## Grey box

Before the analyst starts the assessments, accounts are created for him in the applications to be tested.

## White box

The analyst has the application code and a full access to the applications to the tested applications.

## Navixia SA

Navixia offers a flexible, personalised approach to information security.

## Specialist knowledge

Our efficient, mobile and highly experienced team consists of senior professionals who are all passionate about IT security. Some of them are pioneers and leading experts in their field.

## A reliable structure

Navixia is a Swiss limited company held by private Swiss shareholders.

## Navixia's services include:

### *Preliminary discussion*

meant to define the extent of the audit based on your specific requirements and depending on what elements are most crucial to your security.

### *Customised detailed offer*

based on the above discussion.

### *Implementation of all tests and analyses*

based on a strict methodology.

### *Overall project management*

with regular intermediary feedback.

### *Detailed report*

listing all issues identified during the audit and their potential consequences for your security, including protective actions to implement to enhance your security

### *Conclusion and recommendations*

with subsequent follow-up if required.

### *Presentation and explanation of report*

on site or via telephone conference.

# Trust and Confidentiality

## Our customers said:

“Navixia has always provided me with innovative and intelligent solutions in the field of security.”

“I greatly appreciate the availability and professionalism of its engineers.”

“Trusted partners, with great human and professional qualities.”

“We particularly appreciate the involvement of the Navixia team, both in the successful completion of projects and in handling critical incidents.”

“Navixia is a dynamic company with a competent and committed staff.”

“Navixia’s engineers are a real added value in our projects.”

“A team with great skills and unfailing availability.”

*Extracts from our latest yearly satisfaction survey*

The duration of an assessment depends on the scope of the analysis, which is determined after preliminary discussions.

We remain at your disposal at any time to discuss this in more detail, without any engagement.

A security assessment is a sensitive process since you appoint security specialists, who are not part of your organisation, to analyse the most intimate aspects of your IT infrastructure.

As a result, an extreme level of reciprocal trust is necessary between the parties involved. Navixia provides sound guarantees of security and confidentiality.

## Experience

Navixia can rely on a team of senior professionals, with a long-standing experience in all aspects of IT security. Some of our specialists are leading experts in their field.

## Systematic and verified approach

Following the signature of a non-disclosure agreement and prior to the audit, the extent of the assessment is discussed and defined in full detail.

## Total confidentiality

Our employees follow an extremely strict security and confidentiality protocol for the whole duration of the assessment.

## Swiss company

Navixia is a Swiss limited company held by private Swiss shareholders. We can vouch for the absolute trustworthiness and complete integrity of our employees.

## Strict methodology

Navixia subscribes to the principles of international standard ISO 17799 (BS7799) – a code of practice for information security management. Besides, our assessment methodology is also based on the OWASP risk-evaluation standard.
