

DiagnoPhish

Improve IT security in your company! Assess your security posture. Train your users to understand risks, counter threats and resist phishing.

Many successful attacks rely on phishing / social engineering. Whenever they perform penetration tests or security assessments, our experts have noticed that IT users often fall into the same kind of traps or misunderstand the same issues, putting themselves and their organisation at risk.

Pragmatic solution

Our concrete response to these observations is our IT security awareness platform DiagnoPhish. We have developed this tool to reflect our real-life perception of risks/threats in Switzerland & Europe. It offers practical ways to teach IT users to tackle sensitive issues and deflect threats. As a learning & assessment tool, DiagnoPhish is safe, efficient and highly cost effective.

Simple approach

DiagnoPhish offers security awareness campaigns/trainings based on :

- Pseudo-phishing campaigns
- Security awareness quizzes on specific security issues.
- Video trainings on key security topics

Campaigns can be managed and monitored by you without external intervention – or if you lack time, we provide a managed service.

Contents are available in English, French and German. Other languages or templates can be added on request.

Punctual assessments

They are ideal if you want to precisely evaluate your security posture at a specific point in time, if you need to train your users on a specific subject, or wish to evaluate a new employee's knowledge.

Sustained learning process

Because it takes at least 21 days to change one's habits, DiagnoPhish proposes endurance awareness missions called **IT Security Trails**. After a single initial notification, users are confronted at random intervals with meaningful security-related challenges. Being on alert for a longer period of time improves their awareness of security risks lastingly.

Navixia SA

Navixia is a Swiss limited company which offers a global and pragmatic approach to information security.

Our efficient, mobile and highly experienced team consists of senior professionals who are all passionate about IT security. Some of them are pioneers and leading experts in their field.

DiagnoPhish

A learning and assessment tool developed by Navixia based on field observations. It makes users considerably more resistant to IT risks.

Advantages

Fast and easy to handle

It takes only a few minutes to design and launch a campaign.

Easy monitoring & remediation

You can monitor the users' progress over time and devise corrective actions on a person-by-person basis whenever needed.

Efficient

Over time, you will notice marked improvements in user behaviour.

Fun

Besides targeting security issues in a relatable way, it creates buzz within the company.

Customisable

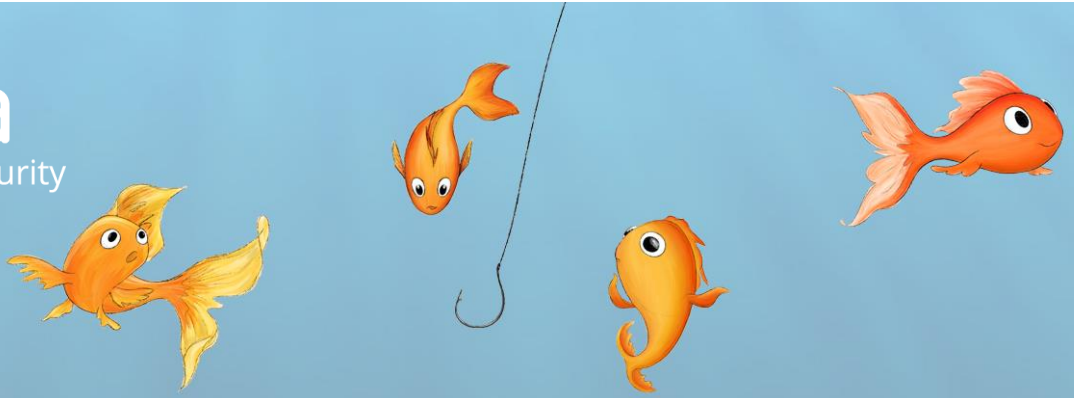

DiagnoPhish proposes ready-made trainings – but you can create your own from the many available elements.

Mobile

Can take place anytime, anywhere.

Flexible & Cost effective

It's up to you: you can handle the whole approach yourself – or we can do it for you. In all cases at a very affordable price!

Flexibility and individual follow-up

The extensive dashboard gives you a comprehensive view of each awareness campaign's process, from start to finish.

This allows you to monitor user performance and propose targeted extra training if and when needed.

Flexible method

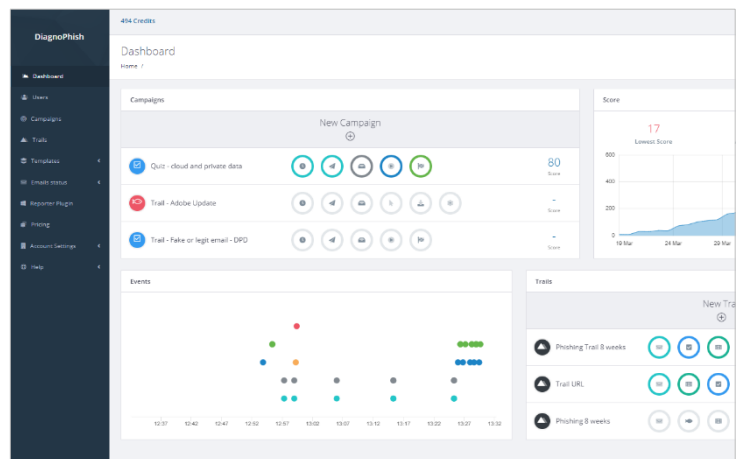

No need to upset everyone's working schedule to organise awareness sessions: challenges only take a few minutes at a time and users can complete them from their workstations or mobile devices.

Gamification

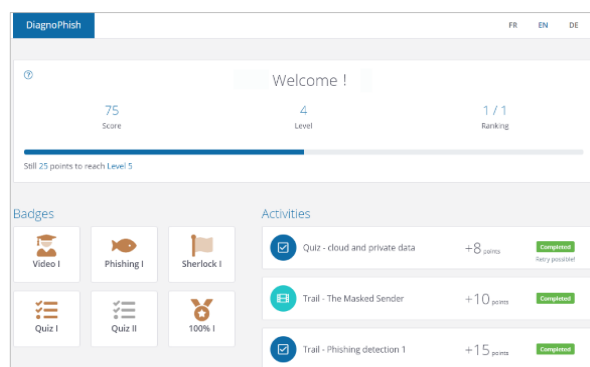

Users are awarded points when they complete events. The more proactive they are, the more it influences their scores. For added motivation, they can track their results on their personal dashboards.

Swiss security standards

DiagnoPhish is developed and hosted in Switzerland and provides the highest security standards of data protection. All data is stored on our infrastructure in Switzerland – and it stays there. No customer information is transferred, seen or used by anyone but yourself. You may delete by yourself all your data stored on our servers at any time you choose.
